Section I - Definitions

For use in this chapter the following terms are defined:

- 1. Administrative Authority means the County Sanitarian as a delegate of authority from the local board of health as authorized by lowa Code section 455B.172, lowa Code Chapter 137, and the lowa Administrative Code 567—69.1(2)
- 2. County Sanitarian means the person appointed by the Grundy County Board of Health to supervise private sewage disposal systems.
- 2. Department means the lowa Department of Natural Resources (IDNR).
- Nuisance means whatever is injurious to health, indecent, or offensive to the senses or an obstacle to the free use of property so as essentially to interfere with the comfortable enjoyment of life or property. This shall include all definitions in Section 657.2 of the Code of lowa.
- 4. **Public Sewer** means a wastewater treatment and disposal facility owned and operated by a corporate public entity such as a city or sanitary sewer district.
- 5. Private Sewage Disposal System means all equipment and devices necessary for the proper collection, storage, treatment, and disposal of domestic wastewater from four or fewer dwelling units or the equivalent of less than 16 individuals on a continuing basis, including domestic waste, whether residential or nonresidential, but not including industrial waste of any flow rate.
- 6. **Septic Contractor** means any person, or business firm, installing, repairing, or providing maintenance of onsite wastewater treatment and disposal systems for compensation.
- 7. Certified Maintenance Technician means any septic contractor who is certified with the manufacturer of an alternative septic system to provide maintenance and service of said system in accordance with manufacturer recommendations.
- 8. All other terms defined in the current issue of the lowa Administrative Code 567 Chapter 69, shall have the same meaningsfor these regulations.

Section II - General Requirements

- 1. Discharge Restrictions. It is prohibited for any household drainage and/or sewage, and any commercial or industrial liquid waste or wastewater to discharge to any ditch, stream, lake, pond, natural or artificial waterway, country drain tile, surface water drain tile, or to the surface of the ground. Such material shall be disposed of in such a sanitary manner as is prescribed by these regulations.
- 2. State Code Adopted. All private sewage disposal systems located in the County, including the corporate boundaries of incorporated cities and towns, shall be constructed and equipped in accordance with the specifications and requirements set forth by the Department in the most current edition of the lowa Administrative Code 567, Chapter 69, and to such additional requirements as are prescribed by the regulations of the Board of Health.
- 3. Permit Required. No person shall begin construction or repair of any private sewage disposal system for any purpose in the County without first having obtained a permit as set out in this chapter. The permit for installation of the private sewage disposal system shall be obtained prior to the construction of or addition to any dwelling or building to be served by this system.
- 4. Alteration Requires Compliance. No person shall begin construction, reconstruction, alteration, or repair of any private sewage disposal system until the owner has complied with all of the applicable regulations of the Board of Health and the lowa State Department of Natural Resources.
- 5. Connection to Public Sewer. No private sewage disposal system shall be installed when a public sewer is available within 200 feet of any building wherein persons reside, congregate, or are employed. In the event that any existing private sewage disposal system should fail, or otherwise be found to cause a nuisance, a connection shall be made to a public sewer within thirty (30) days, when a public sewer is available within 200 feet of the building.
- 6. Update of Failed System. In the event a private sewage disposal system should fail, or otherwise be found to cause a nuisance, and a public sanitary sewer is not available or is not being utilized, said system shall be made to conform to these regulations. If subject system is not made to conform to the aforementioned regulations, habitation of the contributing structure shall be discontinued.
- 7. No more than one dwelling will be allowed on any individual private sewage disposal system without the approval of the Board of Health. All additional buildings, shops, etc. may be added if system size, soil and site analysis will support it.
- 8. When a new dwelling is built in place of an older dwelling, a new private sewage disposal system will be required unless the existing system meets the current requirements of the ordinance. An existing private sewage disposal system shall be inspected to confirm that the current requirements are being met and the system is functioning properly prior to any

new dwelling being connected to said system. A permit will be required to connect a new dwelling onto an existing septic system.

- 9. Conventional soil absorption systems as described in Iowa Administrative Code 567 Chapter 69 are preferred, if soil loading rates as determined from a soil analysis are suitable. Any soil that has unsuitable soil rates or has water table or limiting layer within three feet of the bottom of the trench will not be suitable for a conventional soil absorption system.
- 10. If a conventional soil absorption system is not suitable, an alternative system may be utilized upon approval of the County Sanitarian. A maintenance contract for the service of that system shall be on file prior to any permits being issued and shall be renewed on an annual or semi-annual basis with a certified technician for the life of that system.
- 11. Any septic contractor who designs, constructs, installs, alters or repairs or provides maintenance on any onsite wastewater treatment and disposal system in Grundy County, must have a current license, issued by Grundy County Board of Health, under the provisions of Section VII of this regulation.

Section III - Permit Requirements

- 1. Permit Application. Any person desiring a permit must file with the county Sanitarian an application on the online permitting system. This can be done by the homeowner or certified installer prior to any installation.
- 2. Site Visit Required. Application for a permit to construct, reconstruct, alter, or repair a private sewage disposal system shall not be issued until a site visit with the County Sanitarian and septic contractor has been completed. A test hole will be required to conduct a soil analysis and results of any soil percolation tests performed must be provided to the County on a form approved by the County Sanitarian. If a percolation test is done, it must be performed in accordance with the procedures set out in the lowa Administrative Code 567—Chapter 69. A soil analysis is required and a percolation test is optional.
- 3. Fee Requirement. Upon approval of the system design by the County Sanitarian, the permit will be issued upon payment of the required applicable fees made payable to Grundy County. The fees shall be as follows:
 - \$200 for new installation, including secondary treatment replacement
 - \$100 for tank replacement
 - \$50 to hook a new house or shop onto an existing system
- 4. Fees. Fees may be revised after approval by the Board of Health and by Resolution by the Board of Supervisors.
- 5. Valid Period. Permits shall have validity for a maximum of twelve (12) months from the time of issuance, during which time the private sewage disposal system shall be completed.

Section IV - Inspection

- 1. Notification. The County Sanitarian shall be notified by telephone or in person, not less than twenty-four (24) hours before work commences unless an emergency system arrives. In this situation the sanitarian shall still be notified before installation or repairs.
- 2. Inspection. No part of any private sewage disposal system shall be used, covered or constructed so as to deny inspection by the County Sanitarian. A private sewage disposal system is considered ready for inspection when the house sewer, septic tank, distribution box, and lateral pipe are in place but not covered. If the County Sanitarian is not able to be at the installation or if an emergency installation is needed, installers are required to take photos before any backfilling and submit to the County Sanitarian within 48 hours.
- 3. The County Sanitarian shall take measurements, photos, and document (time/date stamped) the location of the private sewage disposal system.

Section V – Construction Standards

- 1. Construction of private sewage disposal systems shall adhere to the standards outlined in Iowa Administrative Code 567--Chapter 69..
- 2. All plumbing, including gray water lines, must be routed through the septic tank. The County Sanitarian will need to access the basement to verify that all plumbing meets this requirement.
- 3. The connection from the house to the tank must be inspected to verify that the pipe is of proper material and is not cracked or in otherwise poor condition before connecting to said pipe.
- 4. Any connecting lines under driveways shall be protected from freezing.
- 5. Septic tanks will require at minimum, 2 18" diameter risers to be brought to the surface.
- 6. Septic tanks must have an effluent filter installed.
- 7. When constructing a conventional soil absorption system, no part of the soil absorption system shall be deeper than 3 ft and there shall be no less than 3 ft separation from any limiting layer.
- 8. When constructing sandfilters, at-grades, mound systems, or rock & pipe systems, the septic contractor shall provide documentation from the quarry where the sand and gravel is obtained certifying that said material meets the standards of Chapter 567-69.

Section VI -- Maintenance

 It is the homeowner's responsibility to maintain their private sewage disposal system to keep it in good working condition. At a minimum, a homeowner should clean their effluent filter once a year and have the septic tank pumped every three (3) to five (5) years. General maintenance information and "Dos and Don'ts" will be provided to the homeowner after the installation is complete.

- 2. If an alternative private sewage disposal system is installed, the system must be serviced by a certified technician on an annual basis. Effluent samples must be taken twice a year per the National Pollutant Discharge Elimination System (NPDES) General Permit #4 requirements whenever a system discharges into or near a water of the state.
- 3. All maintenance contracts, inspection reports and sample results must be provided to the County by the certified technician within 20 days. If a homeowner fails to renew their contract, it is the certified technician's responsibility to notify the County.

Section VII - Septic Contractor Requirements

Any person, firm or corporation desiring to construct, alter, repair or provide maintenance of any private onsite wastewater treatment and disposal system in Grundy County, lowa shall first file for a license and approval with the Grundy County Sanitarian, conditioned on the faithful performance or all duties and regulations required by the Grundy County Board of Health, and all Ordinances and Regulations of Grundy County and the lowa Department of Natural Resources governing "Onsite Wastewater Treatment and Disposal Systems".

- 1. Persons desiring to obtain a Grundy County contractor's license to install, repair, alter or maintain onsite wastewater treatment and disposal systems must be a holder in good standing of an Iowa Onsite Wastewater Association (IOWWA) certification as a Certified Installer of Onsite Wastewater Treatment System (CIOWTS), either Basic or Advanced Levels. Certification must be obtained and held unexpired. Continuing education credits to be defined by IOWWA Certification requirements. All installations of onsite wastewater treatment and disposal systems require that an IOWWA Certified Installer be on site during the install and inspection.
- 2. The Administrative Authority will issue a Contractor's License, valid for a period of twelve (12) months, provided the applicant is the holder in good standing of the IOWWA Certified Installers License and has met the continuing education requirements of such certification.
 - a. A current bond certificate shall be filed with the application for work to be done in Grundy County. A minimum bond amount of \$10,000 shall be required to cover any loss by Grundy County. Bond certificate obligee shall be Grundy County.
 - b. An annual license fee of \$25 shall be paid at the time of application.
 - 3. Revocation and Denial of License. The septic contractor license may be revoked by the Administrative Authority if terms of this Regulation, Ordinance or any part of the lowa Code, Environmental Protection [567], Chapter 69 are violated. The contractor may only be reinstated at the discretion of the Grundy County Board of Health.
 - a. Upon the discovery of any violation, a verbal warning shall be given and the issue shall be fixed. If the issue is not corrected by agreed upon date determined by the County Sanitarian and the installer, a written notice will be sent to the installer and a citation (\$750) will be issued plus court costs. Any failure to correct said violation will result in a letter of immediate revocation.
 - b. Upon discovery of any second violation, a letter of immediate revocation shall be issued.

- c. After the third revocation of a Contractor's License, the Contractor must provide a certificate of completion of _12hours of education on the proper installation of private sewage disposal systems.
- 4. Revocation Period. Application for renewal of license, when the license has been revoked, will not be allowed for a period of one (1) year from the date of revocation.
- 5. Appeal Hearing. An appeal hearing on license denial or revocation may be requested in writing to the Grundy County Board of Health.

Section VIII - Certified Maintenance Technician

1. Any person performing maintenance on an alternative septic system shall become a certified maintenance technician by taking a certification course through the manufacturer of said system or other approved course. Proof of certification shall be provided to the County prior to providing maintenance on any alternative system in Grundy County.

Section IX - Wells

If a private sewage disposal system is to be constructed, reconstructed, altered, or repaired and a well is located less than the minimum distance as set out in the lowa Administrative Code 567 Chapter 69.3 (2), then the well must be abandoned and properly plugged. The well must be plugged according to rules established in the lowa Administrative Code 567, Chapter 39, "Requirements for Properly Plugging Abandoned Wells."

Section X - Water Line

No house service water line shall be installed so as to interfere with and/or prohibit the installation of a private sewage disposal system. All water lines installed after installation of a private sewage disposal system shall adhere to a 10 ft setback.

Section XI - Variances

Variances to these regulations may be granted by the Board of Health provided sufficient and proposed alternative information is afforded to substantiate the need and propriety for such action. Variances shall be requested in writing and addressed to the Board of Health. All decisions regarding this topic shall be issued in writing to the requester.

Section XII - Appeal

Any person wishing to appeal any notice or order made by the County Sanitarian or the Board of Health shall have the right to appeal to the Board of Health at the next regular meeting. Notice of Appeal shall be in writing and mailed by regular AND certified U.S. Post to Grundy County Board of Health, 706 H Ave, Suite 2, Grundy Center, IA 50638 within ten (10) days of receipt of the notice or order that is appealed and not later than seven (7) days prior to the next regular meeting of the Board of Health. The Board of Health, by a vote of a majority of the members present,may modify, withdraw, or order compliance with said notice or order after hearing. An appeal of the decision of the Board of Health may be made as set forth in Chapter 17A, Code of lowa.

Section XIII - Special Penalty

Any person, firm, partnership or corporation, who violates any of the provisions of this chapter shall be guilty of a county civil infraction and upon conviction thereof, shall be punished by a fine of not more than \$750.00 per offense. In addition, thereto, such persons may be enjoined from continuing such violations and may have their Contractor's License revoked. Each additional day of neglect or failure to comply with such provision, rule, or lawful order after notice of violation by the Board of Health shall constitute a separate offense.

Section XIV - Separability of Provisions.

If any section, paragraph, clause or provision of this Ordinance shall be held invalid, the invalidity of such section, paragraph, clause or provision shall not affect any of the remaining provisions of this Ordinance.

Section XV - Supplemental Power

No section, clause or provision of this Ordinance shall limit the power of the County Sanitarian or Board of Health to obtain injunctive or other relief or to enforce Public Health Laws or Ordinances or standards in any other lawful manner.

Passed and adopted this	day of August 2024
Jon Boleman, Chair Grundy County Board of Health	Barbara L. Smith, Chair Grundy County Board of Supervisors
